International Perspective

As per FAO, India is the second largest producer of paddy globally after China followed by Bangladesh. In 2021, China produced 214.40 MMT of paddy, India produced 195.42 MMT followed by Bangladesh at 56.94 MMT.

According to the World Bank Pink Sheet data, global rice prices (Thai 25 % broken) reached an average of USD 620/MT in January 2024.

Prices are higher month on month by 2% compared to December 2023 when prices were USD 610/MT and are higher 22% year on year. Importantly, when compared to January 2022 , prices have surged by 55%, climbing from USD 419/MT to the current value of USD 620/ MT. The continuous upward trend over the last two years has propelled global rice prices to their highest-ever levels.

The USDA's latest projections for the 2023/24 period indicate global rice production at 513.7 MMT, slightly lower than the earlier estimate of 518 MMT. Nevertheless, this figure is marginally higher than the 513 MMT estimated for the same period in the previous year.

As of Feb 1, 2024, global opening stocks for rice stood at 176.3 MMT, reflecting a 4% year-on-year decrease from the 183.2 MMT recorded on Feb 1, 2023

Commodity Report: Rice

Key parameters on commodity situation are discussed below

CROP CALENDAR:

Rice is sown in kharif, rabi & summer seasons. Currently, rabi rice is being harvested and summer rice sowing is in progress

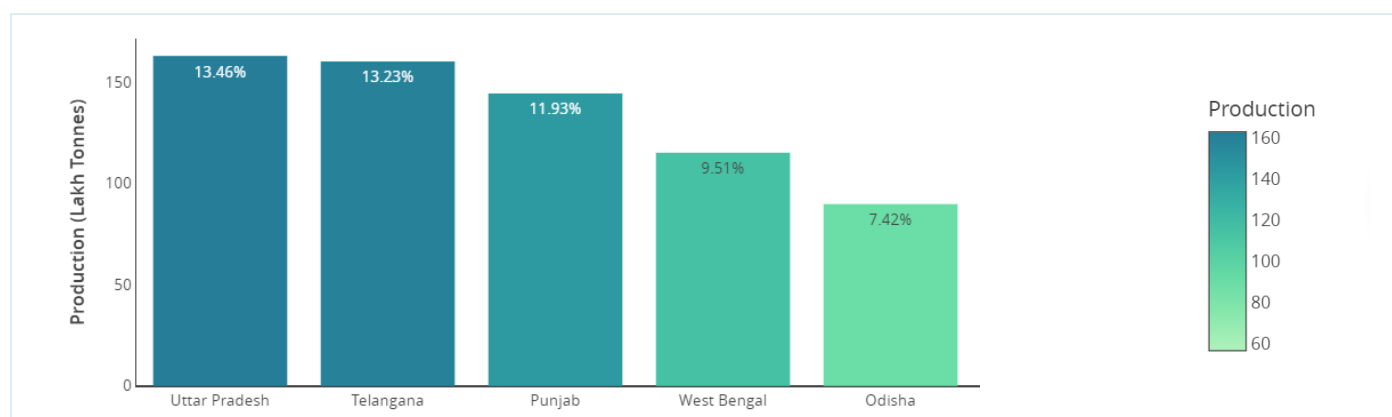

Figure 1: Crop Calendar

PRODUCTION:

As per GOI's **Second Advance Estimates** for **2023-24**, rice production is estimated to be **1238.15 LMTs** for kharif & rabi season (excluding summer)

Figure 2: Statewise Rice Production Share of Top 5 States (2023-24)*

*Values from 2023-24 are from 2nd Advance Estimate, Kharif & Rabi (excluding summer)

Table 1: Top 5 Rice Producing States, 2023-24* (Production in LMTs)

State	Current Year (2023-24)*	Previous Year (2022-23)	Year (2021-22)	Last 5 years Average
Uttar Pradesh	162.98	161.43	152.72	156.00
Telangana	160.25	158.77	124.10	105.20
Punjab	144.45	129.91	128.85	126.52
West Bengal	115.19	154.84	167.29	161.72
Odisha	89.83	82.50	92.91	84.89
All India	1238.15	1357.55	1294.71	1249.88

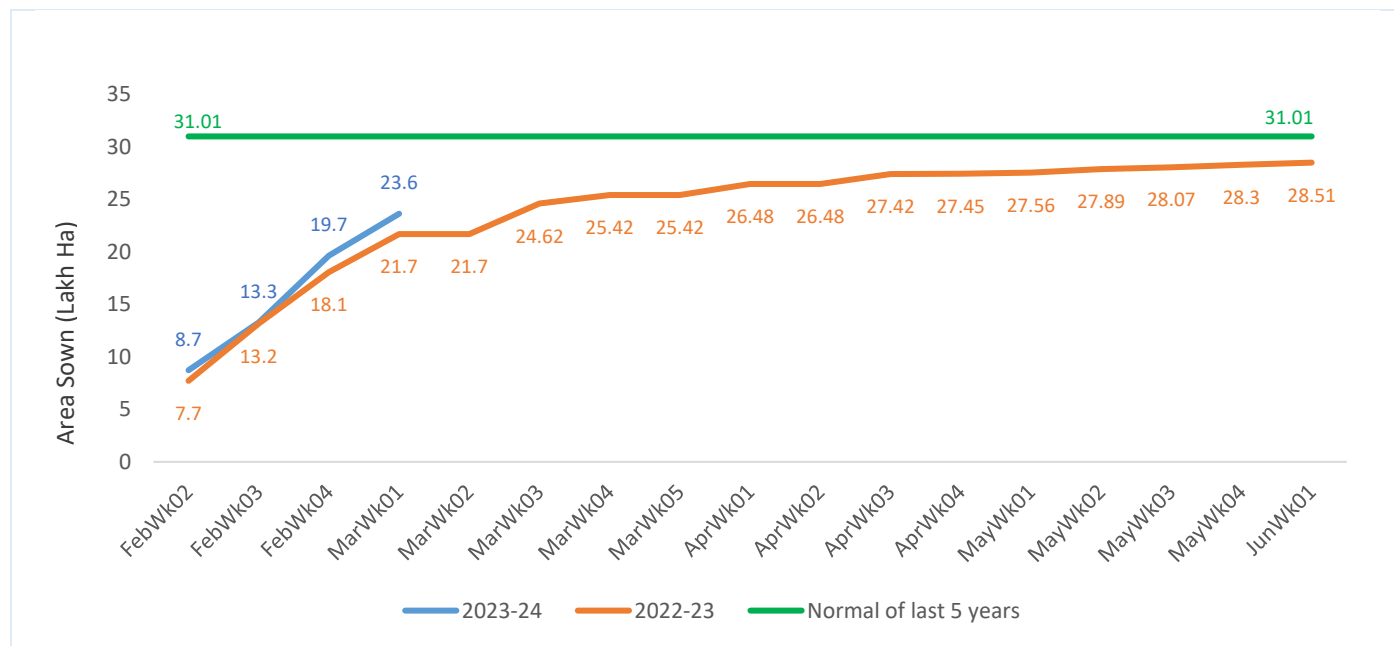

*Values from 2023-24 are from 2nd Advance Estimate, Kharif & Rabi (excluding summer). For previous years summer is included

Source: DA&FW

SOWING:

As per data from CWWG, since the onset of summer sowing season till **01 Mar 2024**, **23.64 lakh hectares** of area is sown under rice. This was **8.89% higher** compared to previous year and **23.77% lower** than the normal. In major summer rice producing states, sowing was reported to be **lower** in **Karnataka** and **higher** in **West Bengal**.

INFLATION:

WPI inflation: Inflation in the Wholesale Price Index in **Jan 2024** was **7.51% lower** than **12.37%** reported in the same month last year and **lower** from **7.84%** reported in previous month.

CPI inflation: Usually, CPI inflation in rice tends to be at its lowest level in Oct, Nov & Dec, which coincides with the kharif crop's harvest. It rises thereafter, and arrival of rabi & summer crop tends to moderate the rising trend around Jul or Aug & CPI inflation peaks in Sep, right before the onset of the next kharif crop. Inflation in the Consumer Price Index in **Dec 2023** was **12.33%** which is **higher** than **10.49%** reported in the same month last year and also **higher** than **11.81%** reported in previous month.
